DUAL STABILISER FIBRE ADDITIVE

Pulverised nylon-based polymer fibres and rubber fleck

 **Nationwide Delivery**

FUNCTIONALITY

A Dual Stabiliser provides stable and comfortable cushioning to horses of all disciplines to enhance their performance in the arena.

This stabiliser provides excellent stabilising properties, permeability and moisture retention when blended with equestrian silica sand.

LOOK

We ensure our Dual Stabiliser Fibre Additive is consistently coloured to offer the most visually pleasing stabiliser solution possible for your arena.

COST

We price competitively. So get in touch to discover how little a Dual Stabiliser Fibre Additive can cost!

-  **Stable**
-  **Retains Moisture**
-  **Low Maintenance**
-  **Supportive**
-  **Professional Installation Available**
-  **Consistent Colouring**

After doing a ton of research I ordered my surface from combi ride. They were always promptly informative and helpful - and I asked lots of questions! My surface is now complete and I am so thrilled with it! A highly recommended company.

Sioux Gar

Fantastic service and always happy to help, prompt at getting back to emails, arrived on site and just cracked on with the job. No problems at all and our surfaces look amazing and fresh again! Highly recommend, can't thank you guys enough!

Emelia Maddox

*As with all sand and fibre surfaces, for optimum performance Dual stabiliser may require additional moisture and maintenance during long spells of dry weather to prevent fibres rising to the top of the surface.
